Northeast Federal Fishery Dependent Data Visioning Project Workshop

June 30 - July 1,
2014

Attention Harvesters, Dealers, and Industry Members

You are invited to an industry workshop on modernizing fishery dependent data. This workshop is part of the Northeast Federal Fishery Dependent Data Visioning project, a coordinated effort aimed at improving the usefulness, timeliness, and delivery of fishery dependent data in the Greater Atlantic Region.

Workshop participants will:

- Learn about the Northeast Federal Fisheries Dependent Data Visioning Project.
- Reflect on existing fishery dependent data systems.
- Identify key characteristics of an ideal fishery dependent data system.

This workshop is sponsored by the Gulf of Maine Research Institute (GMRI), in partnership with UMass Dartmouth's School for Marine Science and Technology (SMAST) and NOAA Fisheries' Greater Atlantic Regional Office (GARFO) and Northeast Fisheries Science Center (NEFSC).

Workshop Detail

Date: June 30 - July 1, 2014

Where:

Waypoint Event Center
New Bedford, Massachusetts

Registration is required, to apply
